

**Can you scan and email me  
copies of my apostille  
certificates before you mail  
them back to me?**

Sorry, we cannot.

The reason for this is that our employees go straight from the steps of the Texas Secretary of State office with your newly issued apostille certificates directly to a FedEx Office, UPS Store, or DHL accepting office. To make the razor-thin shipping cutoff times since COVID and to make sure no errors happen we will not do scans.

But we always take a photo of your apostille certificates and email you the photos to let you know when your apostille order has been completed and mailed out.
