

Where do I download a UPS international shipping invoice template at?

If you're wondering where you can download a UPS international customs shipping invoice template to complete and include along with a prepaid return UPS shipping label that you must mail or email to us.

You can click on the link below to instantly download an editable UPS commercial invoice template PDF for shipping documents internationally. You DO NOT need to do this customs form if we are mailing your documents back to you or someone else within the United States.

When you go to UPS.com to create and buy a prepaid return shipping label, please make sure to print out the entire PDF that UPS will give you to download before mailing all the return shipping label paperwork to us, or when you email us the UPS shipping label PDF.

Also, when mailing documents internationally you or your company could receive a bill weeks or even months later from UPS to pay for additional customs charges incurred (on top of the prepaid return shipping label that you created and bought) with the customs department of whatever foreign country your documents were mailed to from the U.S. We can't answer any questions about this so please direct all your questions to UPS or the customs agency about this if this were to happen.
