

# How do I obtain an apostille or authentication on my college transcripts or college degree?

Follow one of these two options to apostille college records:

**Notarization of your original college transcripts or college degree** would require you to have a **college registrar or admin official** properly sign your college records **in the presence of a Texas notary public**.

**Notarization of a photocopy** of any college transcripts or degree would require the owner (you) of the original document to **sign a certified copy affidavit** (we provide you that document on this website so click the links above), **in the presence of a Texas notary public**.
