

How do I obtain an apostille or authentication on my high school transcripts or diploma?

Follow one of these two options to apostille high school records (follow the same process for middle and elementary school records):

Notarization of your original high school transcripts or high school diploma would require you to have a high school registrar or admin official properly sign your high school records **in the presence of a Texas notary public.**

Notarization of a photocopy of any high school record would require the owner (you) of the original document to **sign a certified copy affidavit** (we provide you with this document, so click on the links above), **in the presence of a Texas notary public.**
